No matter what form of entity your business operates under, there are considerable risks and liabilities that must be taken into consideration.

With so many potential pitfalls, problems and conflicts to recognize and navigate in this challenging and uncertain business climate, operating a non-profit organization with integrity means to do what is proper. This means that the survival of your organization can often depend on your ability to make the right choices, often under pressure.

This webinar provides an overview of various activities that place non-profit organizations at risk of losing their tax-exempt status. The session also covers effective strategies and ethical practices of responsible management that are essential to the avoidance of legal pitfalls for non-profit organizations.
